

Safety regulations of Histology and Embryology Department (workplace safety training)

1. Students are obliged to follow safety, hygiene and fire regulations (mandatory training organized by OSH according to Rector of Medical University in Wroclaw decree of July, 30, 2011 No 23/XVR/2011).
2. Students can be present in classrooms only while taking part in classes or seminars.
3. Students are allowed to leave the classroom only with the permission of the teacher.
4. During histology classes students are obliged to use microscopes according to the instructions given at first histology meeting (principles of proper microscopy).
5. All microscopes should be switched off at the end of histology class and the workplace should be left in proper order.
6. In case of microscope or slide damage student should immediately inform the teacher about it.
7. During classes each student is responsible for assigned microscope and slides.
8. No eating and/or drinking is allowed in classrooms.
9. Using of mobile phones is forbidden during classes and seminars.
10. Windows opening by students themselves is forbidden.
11. Coats, jackets and umbrellas must be left in locker-room before classes. Bags should be placed on shelves under the tables to not disturb people movement.
12. Smoking and using of open fire (e.g. lighters) is forbidden in the entire building.
13. It is forbidden to bring any flammable liquids to classroom.
14. In case of any danger such as fire, students should immediately alarm the teacher and other people.
15. Escape routes in the building are adequately marked. Fire extinguishers are located in marked places in classrooms and corridors.
